

Product Description

SMALL G9 LED BULB

Small G9 LED bulb is a small pin-based lighting source. G9 bi pin LED lamp consists of plastic shell, smd2835 led chips, Aluminum ring heat dissipation plate and G9 feet. Aluminum ring is designed as heat dissipation structure to reduce light decay, and its two-pin mental pins(G9 feet) are compatible with standard interfaces and can be quickly installed without tools. On one hand, 4W G9 LED capsule is equivalent substitute for 40W halogen bulb, on the other hand, its materials' cost is lower than ceramic G9 although its usage scope is less than ceramic type. It is suitable for various scenarios such as homes and commercial places.

Advantage

- Energy saving

G9 bi pin LED lamp is with high efficiency, such as 4w G9 LED capsule can replace 40W halogen bulb to save at least 90% electricity.

- Budget-friendly

It is more affordable than ceramic G9 bulbs.

-Great heat dissipation conditions

Aluminum ring is inside the lamp to meet heat dissipation, reducing luminous attenuation partly.

-Lightweight design

G9 feet's LED bulb is in lightweight design to install in hanging fixtures easily.

-Environment friendly

There is no harmful lead or mercury and radiation inside G9 bi pin LED lamp.

Feature

- ✓ Transparent PC cover outside
- ✓ Zero UV/IR emission
- ✓ Directly used for traditional G9 interface without changing lamps
- ✓ Aluminum ring heat dissipation plate
- ✓ 15000 hours life span
- ✓ Non-dimmable

Application

The application fields of Small G9 LED bulb are as below:

- Home lighting

Decorative lighting fixtures: Commonly used in decorative lighting fixtures such as crystal chandeliers, pendant lights, and wall lights. Plastic lamp can reduce the overall weight and ease the installation burden.

Ceiling fans lamp: The lightweight for G9 led no flicker lamp make it suitable for long-term operation of ceiling fans for lighting.

Vanity lamp: The plastic is moisture-proof and insulated, making the lighting for bathroom make up safer.

Desk lamp: G9 led no flicker lamp could protect eyes, which could creat a friendly reading environment.

- Commercial lighting

Display lighting: Used in store windows and display cabinets to show the character of product.

Ambiance lighting in hotels/restaurants: Used in small - scale ambiance lighting fixtures, combining aesthetics and safety.
